

Gain Control of Estimated, Pending and Active Claims

In addition to the built-in laytime functionality in the core Operations Module, IMOS provides a workflow management module for demurrage analysts. The Demurrage module creates an overview of estimated, pending, and active demurrage claims—both payable and receivable. Analysts can easily review their tasks and outstandings-enabling companies to more quickly assess their risk exposure, and process or contest demurrage claims.

Business Benefits

- React to risk exposure in real time
- View high and low levels of estimated, pending and active claims
- Easily access tasks and outstanding claims
- Swiftly process or contest demurrage claims
- Assist analysts in decision making beyond IMOS Operations capabilities

Veson Nautical IMOS V6 Hardware Requirements & Recommendations

Client Machine

Client-Server Interface	ODBC, ADO.NET, .NET Remoting over TCP
Recommended Operating System	Windows XP or Windows Vista
Remote Access	Citrix / Terminal Server
Client-Specific Requirements	.NET Framework V3.5
Hardware Requirements	Pentium 3, 512 MB RAM
Minimum Display Resolution	1024 x 768
Web Browser	Microsoft Internet Explorer V6 or V7 (recommended)
Multimedia Software	Adobe Flash Player (for tutorials)

Application Server

Application Server Details	IMOS V6 on .NET Framework V3.5, SP 1 or later
Hardware Requirements	2.8 GHz CPU, 2GB RAM, 60GB HD
Server Operating System	Windows 2003, Enterprise/Standard Edition, SP 1 or later
Server Hardware Requirements	2.8 GHz CPU, 2GB RAM, 80GB HD

Database Server

Hardware Requirements	Dual Xeon, 2.8 GHz CPU, 4GB RAM, 160GB
Server Operating System	Windows 2003, Enterprise/Standard Edition, SP 1 or later
