Veson Nautical Announces Veslink Premium OnBoard and Agent Portal

***Company Also Unveils New Tool: Veslink Offline Forms;
New Modules and Tool Added to Web-based Communication Service
For Enhanced Data Management for Ship, Shore and Port Staff***

Boston, MA and Athens – (June 7, 2010) — At The Posidonia 2010 International Shipping Exhibition, Veson Nautical, the premier provider of Maritime Enterprise Resource Planning (Maritime-ERP) solutions and services, today announced two modules for its easy-to-use, automated communication service: Veslink Premium OnBoard and Veslink Agent Portal. These two Veslink additions offer shippers, vessel personnel, office staff and port agents a configurable web-based service for collecting and exchanging data vital to successful shipping operations. In addition, Veslink Offline Forms is Veson's cost effective "e-mail based" offering that is ideal for Time Charter or SPOT vessel operations with minimal software.

Veslink Premium OnBoard

Veslink Premium OnBoard enables two-way communication between the vessel and onshore office for the collection of vessel reports including position/noon, port activity, departure, and custom reports. All reports are submitted and routed via the web or email to onshore company offices and can also be sent to port authority and agents. Premium OnBoard simplifies, manages and automates the complex data that is required for port calls.

"One major benefit for customers is that Veslink Premium OnBoard can customize forms to the specific needs of the user. In fact, we created a very flexible platform so shipping organizations can create their own form definitions. This is critically important as requirements for vessel reports can vary greatly from company to company and even within a company's various fleets.

This tool enables shippers to import port and vessel data quickly, driving efficiency across the entire organization,” remarked Veson.

Veslink Agent Portal

This module offers a direct, secure, quality-controlled link between IMOS and a company’s affiliates such as Port Agents who need access to enter operational data. The solution includes a configurable security model that supports integration with IMOS and other agent specific portals.

Veslink Agent Portal consolidates all data entry into a secure, password protected online web portal. Agents access their assigned port calls and enter their data into the portal. Agent port data can be fed directly into a Veslink database and the information is uploaded immediately to IMOS6. The result is more efficient back office processes, elimination of data re-keying and reduced manual errors.

Veslink Offline Forms

Offline Forms is a simple, cost effective “e-mail based” offering that is ideal for Time Charter or SPOT vessel operations. It requires no software installation on board and is not dependant on the Web. Forms, which can be configured for each company, fleet or vessel’s requirement and can range from noon reports to cargo handling reports to port authority notices, are submitted via email to IMOS. The email is automatically read by Veson’s Veslink and the data is fed directly into IMOS. The result is less work for both office and vessel staff through the elimination of data re-keying and reduced manual errors.

Veson also offers Veslink Distances, which, along with Veslink Premium OnBoard, Veslink Agent Portal and Veslink Offline Forms, are available today. For more information, contact the Boston HQ at +1.617.723.2727 or email info@veson.com.

About Veson Nautical

Founded in 1979, Veson Nautical is the premier provider of Maritime Enterprise Resource Planning (Maritime-ERP) solutions and services. The company’s proven, open-system

approach is based on best practices developed over its 30-year history in the shipping industry. Today, Veson's core offerings include IMOS (Integrated Maritime Operations System), which offers modules for Chartering, Operations and Financials; and Veslink, which are highly configurable web-based services that create a network of trusted contacts for exchanging vital shipping data. Veson's suite of offerings consolidate, analyze and leverage data across all commercial shipping activities, allowing users to enhance decision-making, manage risk and maximize profit. The company may be reached via the web at www.veson.com or in their Boston, MA headquarters at +1.617.723.2727.
