

Software Developer – Boston, MA

As a Veson Nautical software developer, you will help improve, develop and ensure timely delivery of current and new products. You will prepare specifications, design, code, test, document, and support software that makes Veson Nautical stand out from the competition. You will collaborate with QA to develop effective test plans to assure high-quality software. You may improve current products, maintain internal systems or help design and implement future planned products.

About Veson Nautical

Veson Nautical, a U.S.-based maritime software developer, delivers technologically advanced, easy to use, highly graphical software solutions to maritime commerce organizations throughout the world. These proven solutions allow users to manage and share information efficiently across Chartering, Operations, Trading, and Accounting departments, streamlining workflow, cutting costs and optimizing profits.

With offices in Boston, Athens, Rotterdam and Singapore, Veson Nautical is a dynamic organization with a committed team of executives, product managers, software developers and customer service experts. Dedicated to ensuring the highest level of customer satisfaction, Veson Nautical brings decades of experience, technical knowledge, enthusiasm and commitment to clients around the world.

Technology

Currently, Veson Nautical products are built primarily with C++, C#, XHTML, AJAX and CSS.
