

Software Developer Intern

As a Veson Nautical intern, you will help improve and develop current and new products. You will design, develop, code, test, document, and support the software that makes Veson Nautical stand out from the competition. You may be working on improving current products, maintaining internal systems or helping design and implement future planned products.

Technology

Currently, Veson Nautical products are built primarily with C++, C#, XHTML, AJAX and CSS. Although it is not required to be an expert in these specific languages to start with, we expect you have in depth knowledge of some programming language, have excellent coding skills and the ability to master any technology, language, or development environment when needed.

Requirements

- At least 2.5 months of availability
- Mastery of a computer programming language
- Ability to learn new languages quickly and effectively
- Desire to work in a fast-paced entrepreneurial setting
- Ability to readily adapt to changing systems, requirements and business needs
- Excellent grades
- Proactive, positive approach to work
- Legal right to work in the U.S.
